

FLORIDA WING CADET HONOR SOCIETY

Mission: The purpose of the Cadet Honor Society (CHS) is to recognize academic excellence within the Cadet Program by allowing those cadets who've consistently demonstrated superior academic performance the opportunity to be recognized among their peers.

Criteria for Induction: A member must fully qualify for the category of induction they choose to apply for, whichever is higher, with the exception of Member of High Distinction which can only be obtained during cadet officer phases. A cadet who has a mixture of scores above 90% and 93% must choose only the category of induction they fully qualify for. A cadet who achieves the Society Member induction is encouraged to improve their scores in the future to qualify for induction as a Member of Distinction or Member of High Distinction. Any scores used for a previous induction cannot be used for future inductions. For example, a cadet who uses achievements 1-3 and the Wright Brothers Award for Society Member induction cannot use any of those scores towards a Member of Distinction or Member of High Distinction induction but may include any testing completed from achievement 4 and upward, if they are completed consecutively.

Applications can be made on FLWG Form 501.

You must be a member in good standing to apply. There is no timeline to qualify, and all scores will be considered for retroactive consideration if completed consecutively.

Society Member (C/Amn-C/Col):

Maintain a minimum score of 90% or better per achievement or milestone test for four consecutive achievements. If the achievement only requires one test (such as achievement 1 which has only a leadership test), that one test will count for the whole achievement. The same applies to milestone awards that have a combined leadership and aerospace test rather than two separate tests. However, if there is an achievement or milestone test that requires two separate tests, leadership and aerospace, both tests will require a 90% or better for that achievement to count.

Only the **original** test score will be used. Additional attempts will not be counted.

Member Of Distinction (C/Amn-C/Col):

Maintain a minimum score of 93% or better per achievement or milestone test for four consecutive achievements with no time frame. If the achievement only requires one test (such as achievement 1 which has only a leadership test), that one test will count for the whole achievement. The same applies to milestone awards that have a combined leadership and aerospace test rather than two separate tests. However, if there is an achievement or milestone test that requires two separate tests, leadership and aerospace, both tests will require a 93% or better for that achievement to count.

Only the **original** test score will be used. Additional attempts will not be counted.

Member Of High Distinction (C/2Lt-C/Col):

Must have previously received the Member of Distinction induction.

Maintain a minimum score of 93% or better per achievement or milestone test for four consecutive achievements with no time frame. If the achievement only requires one test (such as achievement 1 which has only a leadership test), that one test will count for the whole achievement. The same applies to milestone awards that have a combined leadership and aerospace test rather than two separate tests. However, if there is an achievement or milestone test that requires two separate tests, leadership and aerospace, both tests will require a 93% or better for that achievement to count.

Only the original test score will be used. Additional attempts will not be counted.

Grandfathering from previous induction criteria:

Anyone who has been previously inducted as an inductee or member of distinction under the previous guidelines may continue to wear the shoulder cord, but it not permitted to wear the gold aiguillette unless they have qualified for the Member of High Distinction under the new criteria. Anyone previously inducted is encouraged to continuing striving for excellence by working towards achieving the Member of High Distinction.
